★ Summary

I am an experienced full-stack developer with expertise in DevOps and knowledge of various software design patterns. My strength lies in back-end technologies such as ASP .NET Core, Nest.js, and Express.js with TypeScript, as well as my love for containerization. I am well-versed in RDBMS and have experience with NoSQL DBs. On the front-end side, I excel in React and Next.js and have worked with various web3 frameworks. As a team player, I am experienced in Agile methodologies and passionate about blockchain development, with a goal to improve the web3 space for the end-user.

📁 Work experience

📅 11/2020 – 07/2021 📍 MOSCOW, RUSSIA
Software Development Engineer
Amkapital

📅 04/2022 – 09/2022 📍 DUBAI, UAE
Senior .NET Developer
Infostrategic

📁 Projects

TimePact (Scaling Ethereum 2023)

Used stack:

node.js (express), React, Next.js, wagmi, Ethers.js, IPFS, docker, nginx, Solidity, hardhat, foundry

Multi-user chat

Used stack:

ASP.NET Core, SignalR, Entity Framework, Oracle DB, swagger, OAuth 2.0

Student attendance monitoring service based on ML

Used stack:

ASP.NET Core, Entity Framework, flask, selenium web driver, jitsi-meet, Oracle DB, swagger, JWT Auth

👤 Education

BA of Computer Science - Higher School of Economics

🔧 Skills

Programming languages

C#, C++, JavaScript, TypeScript, Solidity, Python, SQL

Back-end stack

node.js (express, nest.js), ASP .NET Core, Entity Framework, SignalR, Flask, RDBMS, redis, MongoDB

Front-end stack

React, Next.js

Other

nginx, docker, kubernetes, git, DB architectures, swagger, JWT, OAuth, OAuth 2.0, Identity Server, Selenium, Agile, Software design patterns, Documentation

🌐 Languages

Russian	Native
English	C1
German	A2

📁 Interests

Triathlon, Finance, Blockchain
